

Esports Competition Kit

All-in-One Esports AV Solution

The Extron **Esports CompKit** is an all-in-one AV solution for competitive and recreational gaming, live events, and sports analysis. Designed to be housed in a single rack, this all-in-one system can be deployed as a portable system or installed as a permanent AV solution. It easily supports 1v1, 2v2, 3v3, 4v4, and 5v5 esports competitions with seamless plug-and-play functionality.

Built for flexibility and performance, the CompKit features real-time annotation tools, customizable multi-view layouts, and an intuitive touchpanel interface for effortless control.

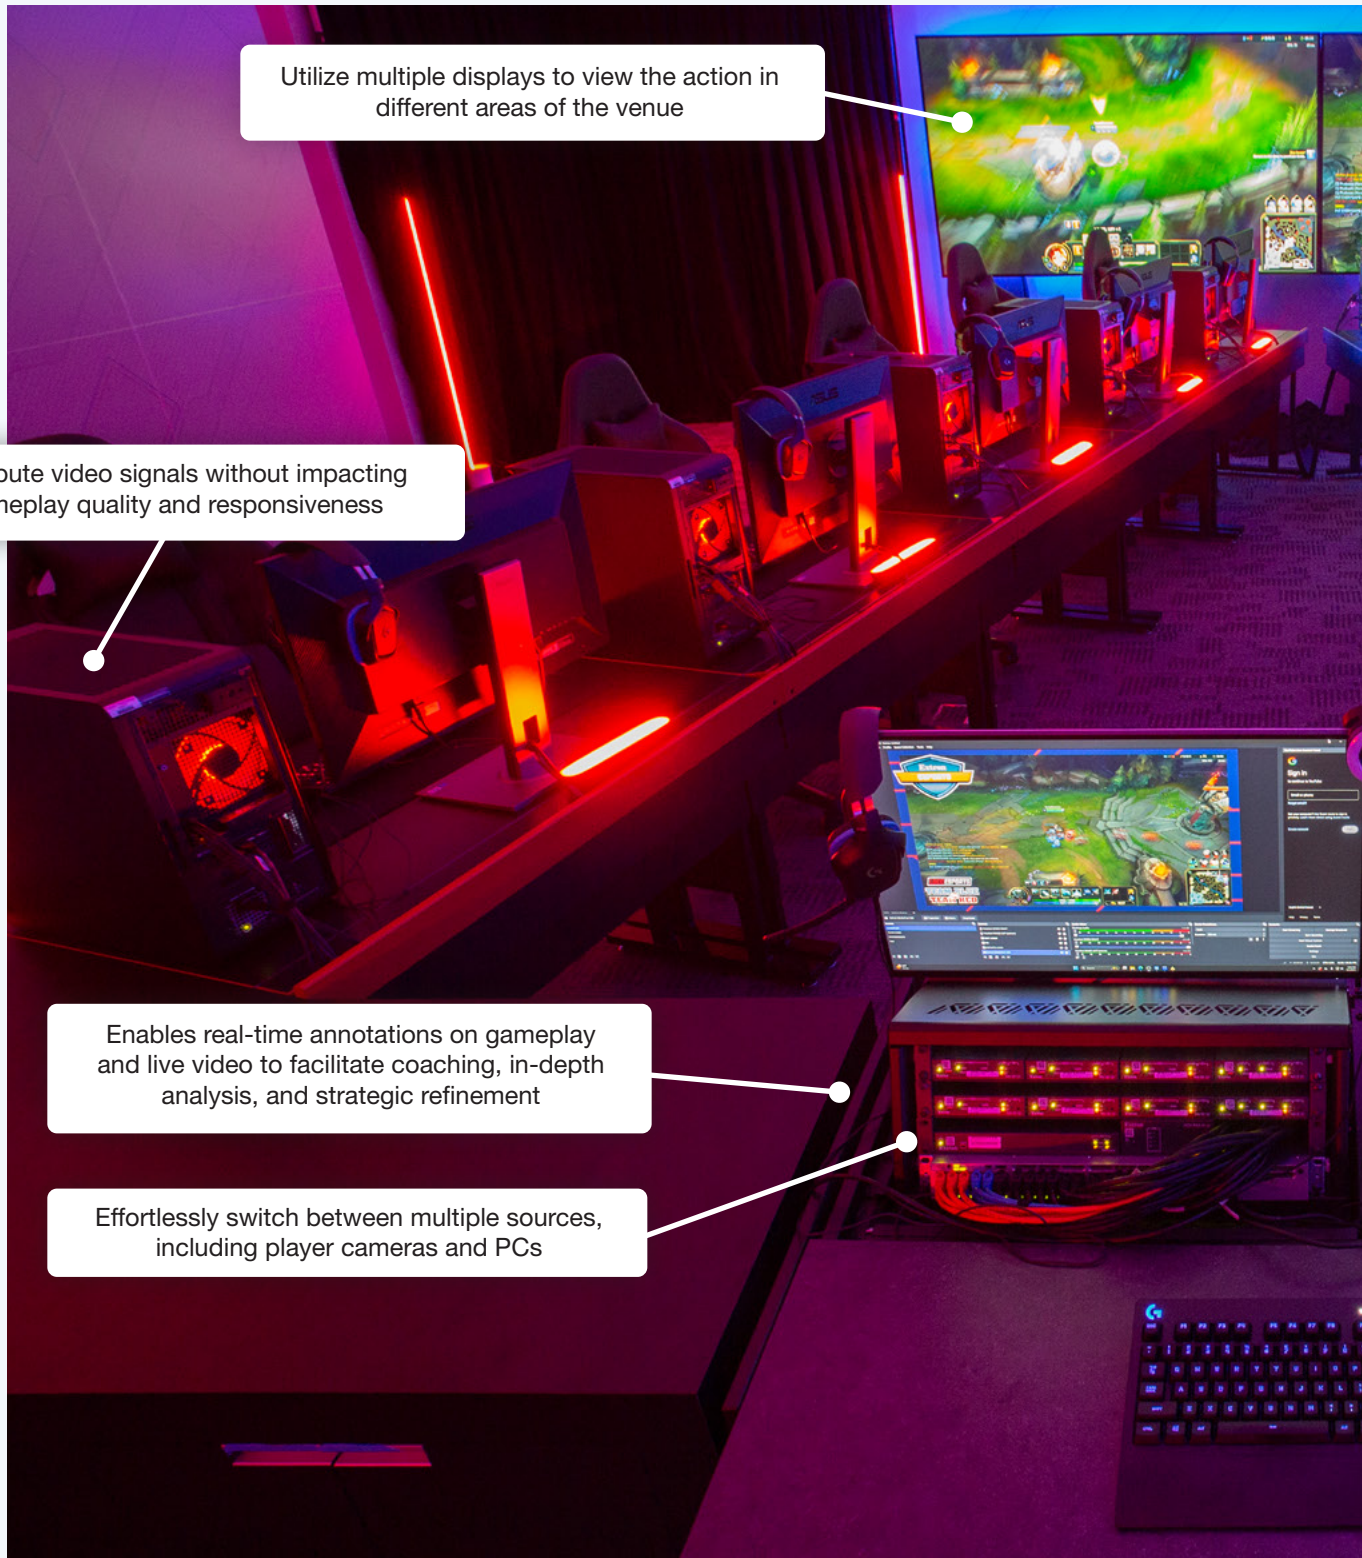

FEATURES

- ▶ Allows for intuitive gameplay control, easy navigation between teams, and streamlined setup for competitions.
- ▶ Integrates with PCs, media players, cameras, and displays to deliver sharp, accurate scaling and 4K resolutions.
- ▶ Real-time annotations over gameplay and live video for coaching, feedback, analysis, and strategy improvements.
- ▶ Complete audio system featuring advanced DSP, Extron's award-winning amplifiers, and speakers that provide best-in-class sound reproduction.
- ▶ Flexible design, scalability, and adaptation ensure the AV system suits the needs and specifications of many competitive esports environments.

Extron

Game-Changing Technologies for Event Production

The Esports CompKit is designed to create engaging, professional-grade experiences that scale with your needs. Along with advanced AV switching and distribution, the CompKit delivers sharp images and high-quality resolutions without impacting performance. Customizable multi-window layouts enhance content presentations during gameplay, while strategically chosen audio components make every moment feel more immersive. Everything is tied together with an intuitive interface, giving you streamlined control over your event production.

Utilize multiple displays to view the action in different areas of the venue

Distribute video signals without impacting gameplay quality and responsiveness

Enables real-time annotations on gameplay and live video to facilitate coaching, in-depth analysis, and strategic refinement

Effortlessly switch between multiple sources, including player cameras and PCs

Video Switching and Distribution

Scaling and Image Processing

System Control

Audio

Streamlined Setup

Incorporate Shoutcaster audio to hear live commentary and analysis of the action and maintain viewer engagement

Complete AV system control for esports facilities and multipurpose spaces

Seamlessly adjust audio levels for both in-venue and on-stream experiences

Dynamic window layouts enhance audience engagement

Powering the Play

Players

Uncompromised Player Experience. The Esports CompKit works without impacting gameplay quality and responsiveness. It preserves the real-time experience players expect. Supporting up to 5v5 competitions, it also allows players to compete in team gameplay genres such as MOBA (multiplayer online battle arena), RTS (real-time strategy), and FPS (first-person shooter).

Audience

Elevated Viewing Experience. Dynamic visuals and rich sound captivate the audience and heighten engagement. As you watch the action at the venue or via the stream, the result is an immersive, high-energy atmosphere that leaves a lasting impression.

Coaches

Enhanced Training & Analysis. Real-time video processing and switching make it easy for coaches to review gameplay footage. Annotation enhances tactical clarity, improves communication, and enables easy post-game strategy review.

Event Managers

Simplified Mobile AV System. This versatile, all-in-one mobile solution is designed for rapid deployment. Event managers can quickly set up and break down equipment, ensuring easy transportation between arenas, facilities, and multipurpose spaces.

Whether you're hosting a tournament, analyzing gameplay, or broadcasting live, the Esports CompKit delivers professional-grade production with unmatched convenience.
